

# How GRIRR transformed Farhan's life

*Garden Reach Institute for  
Research and Rehabilitation*

Farhan was  
born with a  
bent foot.

The parents  
lost hope.  
'Aisa hi rahega  
zindagi bhar?  
Kamaayega  
kaisay?'

The result  
is that  
Farhan was  
admitted for  
treatment at  
PG  
Hospital...  
he was only  
12 days old.

The hospital  
applied a series  
of 16 plaster  
casts.

The 2020  
lockdown  
disrupted  
treatment.

A young boy with curly hair is wearing dark sunglasses. The image is overlaid with a teal color. Text is centered over the lower half of the image.

Doctors  
recommended  
surgery. The  
parents said:  
‘Itne paise nahi  
hain.’

One day  
someone  
mentioned  
'GRIRR'. That  
proved to be a  
gamechanger.

GRIRR provided  
special shoes  
for Farhan.  
Administered  
exercises and  
physiotherapy.

It mobilized  
funds for  
Farhan's  
operation  
as well.

The unthinkable  
has happened.  
Farhan can  
now walk like  
any other child.  
Thanks to  
GRIRR.

He now sees  
cricket on TV  
and says, ‘I also  
want to bowl  
fast.’
