

How GRIRR assisted Nabil in walking independently

*Garden Reach Institute for
Research and Rehabilitation*

A young boy with dark hair and a serious expression stands against a teal background. He is wearing a light-colored, short-sleeved shirt and dark pants. His left leg is noticeably bent at the knee. The text is overlaid on the lower half of the image.

Nabil was born with
a bent left leg.

He walked with
pain; he needed
assistance.

His parents held
their heads and
said, ‘Kharaab
kismat, aur
kya?’

They turned to
a prominent
hospital, where
they could
not afford
treatment.

That is when
someone
mentioned
‘GRIRR’. So that
is where the
family went in
2021.

At GRIRR,
Nabil received
physiotherapy
sessions three
times a week
for as low as Rs
10 per session.
Something they
could afford.

In only one-
and-a-half
years, Nabil's
condition has
improved.

He can walk
independently
– without
support.

The parents
say: 'GRIRR
ne bachaa
diya.'
