Events

- **Birthday Celebration with NK Realtors**

Mr. Pawan Agarwal, Director of NK Realtors, celebrated his birthday with the children at our centre, making the day truly memorable. He spent quality time interacting with the children, cut the birthday cake with them, and distributed clothes and snacks to 100 children.

To make the celebration even more special, all the children whose birthdays fell during this month were also invited to join the cake-cutting ceremony and celebration. The event filled the day with joy, laughter, and a strong sense of togetherness, creating cherished memories for every child.

- **Self-Help Group (SHG) Training**

Regular SHG training sessions were conducted to enhance women's livelihood skills, promote entrepreneurship, and strengthen financial independence through skill development.

- **International Yoga Day**

International Yoga Day was celebrated with children and staff through a guided yoga session, promoting physical fitness, mental well-being, and healthy living.

Howrah- Mini Branch

• UDID Card Facilitation Initiative

To ensure that every child with a disability can access government benefits and services, we have started identifying children who do not yet have a Unique Disability ID (UDID) Card. The details of eligible children have been collected, and the registration process has already begun. From this month onwards, our team will accompany the children and their families to the designated hospital to complete the medical assessment and UDID card application process. This initiative will help children gain access to disability certificates, government schemes, and other essential support services.

• One Step Closer (A Success Story of Athar Ali)

Athar Ali, a child with an intellectual disability, joined our Early Intervention Program with significant developmental challenges. Initially, he was unable to sit independently, stand without full support, and experienced sensory difficulties that affected his daily activities and overall growth.

With regular therapy sessions, individualised intervention, and active support from his family, Athar has made remarkable progress. Today, he can sit with minimal assistance and stand with limited support for short periods. His sensory Responses have also improved significantly, enabling him to participate more actively in therapy and daily routines.

Athar's journey highlights the positive impact of early intervention, consistent rehabilitation, and family involvement in helping children achieve greater independence and improved quality of life.

Plan for the Next month:

- Carnival Program by Watgunj Adolescent Improvement Association.
- Awareness Program in the school of Ward No 141, Garden Reach.
- 6 UDID cards that are under process; hoping to get them this month.
- Making of UDID cards and Manobik cards for children of Howrah Unit.
